

Dear Hiring Manager,

I am writing to express my strong interest in the Backend .NET/C# Engineer position within the Core Area of Product Development at Betsson. As an experienced .NET developer with a passion for building great software and a track record of turning ideas into actions, I believe I have the skills and experience necessary to excel in this role.

My background in .NET development, as well as my experience with technologies such as .NET Core, MSSQL, and Git, makes me confident in my ability to contribute to the development of service-oriented solutions for Betsson's online entertainment platform. I also have a strong understanding of concepts such as continuous integration and delivery, cloud technologies, and distributed systems, which I believe would be valuable assets in this role.

In addition to my technical skills, I am a strong communicator and am comfortable working in an agile environment. I am confident in my ability to collaborate with different parts of the organization and share my knowledge with my colleagues. I am also proficient in English, both written and spoken, and am open to supporting project planning efforts.

I am excited about the opportunity to join the Core - Control Centre development team in Budapest and contribute to the development of high-quality products that deliver a great customer experience. I am also drawn to Betsson's commitment to the growth and development of its employees, as demonstrated by the various training and development opportunities available, as well as the supportive work environment and culture.

Thank you for considering my application. I look forward to the opportunity to further discuss my qualifications and how I can contribute to the success of Betsson.

Sincerely,

Ismayilzada Ismayil
