

Dear Sir/Madame

I am writing to express my strong interest in Continental's ADAS Competence Center internship opportunity. As an ongoing student studying Computer Science Engineering at the Budapest University of Technology and Economics, I am excited to apply my knowledge and skills to real-world projects that have the potential to shape the future of autonomous driving.

I am confident that my background in information technologies and computer science, as well as my experience in machine learning and big data using Python, make me a strong fit for this position. I also have a solid foundation in databases and experience in general software development.

I am very interested in this opportunity because I believe that Continental is at the forefront of innovative technologies and services for sustainable and connected mobility. The opportunity to work on the "eye" of autonomous driving and develop deep learning techniques that sense and understand the vehicle environment is incredibly exciting to me. I am also drawn to the chance to work in international teams and contribute to the development of camera products, including forward looking cameras and surround view cameras.

In terms of my availability, I am able to work a minimum of 24 hours per week during the semesters. I am also fluent in English and have intermediate language skills.

I have attached my resume for your review and have included a link to my Github account. Additionally, I have included summaries of any relevant school or hobby projects that are not detailed in my resume.

I have also applied to other positions, but this internship at Continental is my top choice. I believe that the chance to participate in highly innovative projects and contribute directly to software that will save lives on the roads is unparalleled. I am also very impressed by the access to cutting-edge technologies and the friendly, respectful work environment at Continental.

Thank you for considering my application. I am eager to learn more about this opportunity and to discuss how I can contribute to the team at Continental.

Sincerely,

Ismayilzada Ismayil
