

Dear Hiring Manager,

I am writing to express my interest in the Software Developer role at your company. With a strong background in software development and experience in C# and .NET, I am confident that I have the technical skills and passion for software development that you are looking for.

As a student at the Budapest University of Technology and Economics with a Master's degree in Computer Science Engineering, I have a solid understanding of software development methodologies and techniques. I have also worked as a Software Developer at Turanbank OJSC, where I was responsible for developing new software modules for Core Banking Systems, making changes to legacy code, and creating views, functions, stored procedures, and database triggers.

Additionally, my experience as a Research Intern at the National Aerospace Agency Natural Resources Space Research Institute has honed my analytical and problem-solving skills. I have experience with Agile development methodology and have worked with TFS and Visual Studio. I am also experienced with databases, as my work with banks was mostly done with databases, in Oracle and PL/SQL. I have knowledge of MS SQL also.

My strong command of both verbal and written English, combined with my team player attitude and excellent interpersonal skills, make me confident that I will be a valuable addition to your team. I am a proactive, enthusiastic, and self-driven person with a willingness to learn new technologies and take ownership for the solutions I deliver.

Thank you for considering my application. I am excited about the opportunity to contribute to the newly forming team and be part of the realization of your ambitious technology strategy. I look forward to the opportunity to discuss my qualifications further.

Sincerely,

Ismayil Ismayilzada.
