

Dear Hiring Manager,

I am writing this cover letter to apply for the .NET Developer with a Salesforce Field Services module focus role at Unisys. I am confident that my skills and experience align well with the requirements of this role.

As a highly skilled software developer with experience in C# and .NET, I have honed my technical and communication skills through various projects and positions throughout my career. My expertise in C#, Python, Java, and SQL has allowed me to effectively develop new software modules, troubleshoot technical problems, and write optimized SQL queries for integration with other applications. Throughout my experience, I have consistently utilized technology to drive productivity and continuous improvement for maintenance service delivery. Additionally, my proficiency in developer tools such as DevExpress, Visual Studio, and GitHub has further enhanced my ability to create and maintain high-quality software applications. With a Master's degree in Information and Communication Technologies from the Budapest University of Technology and Economics, I am confident in my abilities to continue growing and expanding my skill set as a software developer.

In addition to my technical skills, I have excellent communication and problem-solving skills. As a computer service and repair technician at CompServis, I honed my communication skills while working with customers and business partners. I was responsible for troubleshooting and repairing technical problems, downloading and installing software, and diagnosing hardware and software issues.

I am a quick learner and am always eager to learn new technologies. I have a Bachelor of Science degree in Computer Engineering and a research internship at the National Aerospace Agency Natural Resources Space Research Institute where I worked on modelling objects in the GIS database and using remote sensing in GIS.

The opportunity to work on an exciting migration project, learn a lot, and work on Salesforce modules excites me. I am eager to contribute my technical skills and experience to support the development and implementation of solutions for the application portfolio at Unisys.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further and how I can contribute to the success of Unisys.

Sincerely,

Ismayil Ismayilzada
