Git │ Team Foundation Server

Software Platforms

.NET │ ASP.NET │ .NET Core │ WinForms │ MVC

ADDITIONAL INFORMATION

PROJECTS

15/09/2022 – 19/12/2022
Pre trained Speaker recognition embedding models for disorder speech classifications This project aims to investigate the binary classification of voice disorders using speaker verification embedding models.

Link https://github.com/Isi-Atash/Pre-trained-Speaker-recognition-embedding-models-for-disorder-speech-classifications

01/02/2021 – 12/05/2021
Express bank money transfer systems This project aims to have online and digital money transfers between different branches of the bank. This makes it easier to edit and modify all kinds of information and contracts via core banking system for the internal employees

01/12/2022 – CURRENT
image to ASCII converter I want to create software that makes ASCII art. This is mainly done because of boredom, and ASCII art looks interesting. For now, I have been able to convert images to ASCII, but I am planning to make such that, in the end, it will be possible to convert whole videos and movies too.

Link https://github.com/Isi-Atash/image-to-ASCII-converter

HOBBIES AND INTERESTS

Literature I mostly read cosmic horror (Lovecraftian horror), the terror of the unknowable and incomprehensible. But at the same time, I love starting and finishing a book in one sitting, be it either the best of classic literature or boring textbooks.
