Dear Hiring Manager,

I am writing to express my interest in the Data Engineer role at Deloitte Budapest Data & Analytics Hub. As a software engineer that needed to work more on the database and SQL than programming, I am confident in my ability to contribute to your team and make a positive impact on your projects.

I have a strong background in SQL and relational database technologies, including Oracle and MS SQL. I am adept at performing advanced data manipulations and translating business requirements into code. I have also gained experience in data modelling and ETL solutions, as well as working with version control systems and implementing CI/CD processes. I have been doing research, thesis and laboratory work for big data and machine learning in recent years. In addition, I am a proactive and creative problem solver with excellent communication skills.

I am excited about the opportunity to work on a variety of exciting projects and leverage my expertise with mainstream technologies at Deloitte. I am particularly interested in the opportunity to learn and grow as a Cloud Data Engineer. I am also drawn to the company culture at Deloitte, which values knowledge and promotes rapid career advancement for high-achievers.

Thank you for considering my application. I am excited about the opportunity to join your team and contribute to the success of Deloitte. I look forward to discussing the role in further detail.

Sincerely,

Ismayilzada Ismayil
